EL DISPOSITIVO DE DESCONEXIÓN “AB” PARA ESCOBILLAS DE GRAFITO

THE “AB” CUTOFF DEVICE FOR CARBON BRUSHES

Con el fin de evitar el deterioro o la destrucción de los pequeños motores eléctricos, se puede montar en las escobillas el NUEVO DISPOSITIVO DE DESCONEXIÓN “AB”, que regula automáticamente el desgaste de las escobillas hasta que la sustitución de éstas se hace necesaria.

With the object to avoid the damage or destruction of electric motors, the NEW “AB” CUTOFF DEVICE controls waste of carbon gradually before its natural exhaustion.

Así el control y mantenimiento de las escobillas es innecesario, ya que puede desconectarse automáticamente el motor, garantizando así una seguridad de funcionamiento óptimo.

In this way, the carbon brush maintenance is needless due to the automatic cutoff protecting the motor parts and give warranty of optimal security performance.

Nuestro dispositivo de desconexión no está influido por la temperatura y puede aplicarse a todo tipo de motores universales desde pequeña potencia hasta fuerte intensidad.

No importa si la toma de corriente de la escobilla se realiza por cable o muelle.

This gadget can be inserted in every kind of universal motors within a wide range of power and intensity by the cause cutoff device capabilities are not disturbed for high temperatures neither the current flows across the spring or the wire.

Este sistema está diseñado principalmente para la aplicación en escobillas destinadas a máquinas-herramientas electroportátiles y tipo electrodoméstico.

This device has been designed principally with the purpose to be applied in carbon brushes working in Portable Tools and Electrical Appliances.

FUNCIONAMIENTO DEL DISPOSITIVO DE DESCONEXIÓN “AB” THE “AB” CUTOFF DEVICE RUNTIME

Llegado el límite de desgaste de la escobilla, el sistema insertado en el interior sale y levanta la escobilla del colector, interrumpiendo así el paso de corriente y parando el motor. La concepción del dispositivo de desconexión se compone de un micro muelle de aleación especial y una pieza plástica.

Todo ello permite la mayor seguridad a nuestro sistema en comparación con otros similares. Existen cinco tipos dependiendo de la sección de la escobilla y la longitud residual necesaria.

In the exhaustion point of carbon brush, the internal spring frees out and takes off the brush avoiding the contact with collector. Then, the current cycle is interrupted and the motor turns off. The cutoff device compounds one special alloyed micro spring and one insulating part, both perfectly fastened and assembled.

It becomes the “AB” cutoff device in the more enhanced interrupting scheme applied to carbon brushes. ASEIN applies five kind of cutoff devices to the brushes depending on the Axial and Radial sizes.

MEDIDAS ESCOBILLAS / CARBON BRUSHES DIMENSIONS

$t \times a \times r$

EXPLICACIÓN DE LA FÓRMULA:

- t = Tangencial (en dirección a la circunferencia)
- a = Axial (en dirección al eje)
- r = Radial (en dirección al diámetro)

FORMULA EXPLANATION:

- t = Tangential (in direction of rotation)
- a = Axial (paralel to de axis of rotation)
- r = Radial (perpendicular to the axis of rotation)

CONTENEDORES PLÁSTICOS

PLASTIC ORGANIZERS

Para componer surtidos variados en las cajas metálicas tipo S 50 (ver dorso).
In order to organize assorted brush selections in the metal boxes type S50 (see overleaf)

Se fabrican en 3 tallas en polystirol de alta calidad, permiten composiciones múltiples y van provistos de pestaña para mover y/o señalar .
Made in 3 sizes of high quality polystirol to enable different assortments. With a flap to move and/or mark the organizer.
